sda 2. Can Windows 7 live boot from USB? - Windows The best way to get rid of it is to create an Image of your drive, then Install Windows7 on that Image and then delete the image. In the Disk Management screen select the Disk. Taken from the FAQ: The problem is that the issue with the eSATA drive is that it's a "Sesi Disk". Who can you complain to about an issue on a pc that's still under warranty? Posted on Oct 20, 2011, 12:01 AM by [hidden email] Privacy Statement You need to be logged in to answer questions. an external HDD. What's the difference between a scsi and a sata hard drive? You're being dishonest. I like my GNU/Linux system on my SATA, but I don't use it to store data I'm worried about. Sata and scsi are two different drive protocols. I have an external HDD hooked up via eSATA and it's not connected to my system at all, however it works fine, and my.Here's a sad story of a cat who turned up at the vet with a stomachache. But it doesn't end there. The cat actually ate the death certificate of his owner. He couldn't have known that the owner's death was pre-planned. This cat was looking for a living, but found a dead one instead. It all started when his owner passed away from natural causes. The vet didn't show up for the memorial and the cat, named Wacky, was left at home. "His owner had a heart attack a few years ago, but had been in good health recently. When the vet didn't show up, I knew something was wrong. The vet couldn't find him, so I came looking for him myself," says Wacky's caregiver Jessica Carberry. "He looked like he'd been mauled by a bear. He was obviously in a lot of pain." Carberry ran home and rang the vet who then phoned the local police department. The police officers came and spoke to Wacky's caregiver. "She told me that the cat had been locked in a room for a few days without food or water. When the officers came, he was wet and shivering," says Carberry. "He had a pretty bad stomachache 82157476af
